

NEW JOURNALS TO THE NATURE PORTFOLIO

From 2022 onwards, Springer Nature will add three more Nature journals to the existing portfolio, to further cover specific and unique research areas.

Nature Cardiovascular Research

Nature Cardiovascular Research will be a new addition to health science journals in the Nature Portfolio, publishing basic, translational, clinical and public health research focused on cardiac and vascular function and haematology in health and disease.

Cardiovascular diseases are the leading causes of death and morbidity worldwide. Finding effective ways to prevent, diagnose, treat and cure these complex diseases is paramount to scientific, clinical, pharmacological and public health cardiovascular communities.

Nature Cardiovascular Research will provide a unifying publishing platform and a discussion forum that caters to scientists across the entire spectrum of disciplines focused on cardiovascular and blood health.

Nature Synthesis

Nature Cardiovascular Research will be a new addition to health science journals in the Nature Portfolio, publishing basic, translational, clinical and public health research focused on cardiac and vascular function and haematology in health and disease.

Cardiovascular diseases are the leading causes of death and morbidity worldwide. Finding effective ways to prevent, diagnose, treat and cure these complex diseases is paramount to scientific, clinical, pharmacological and public health cardiovascular communities.

Nature Cardiovascular Research will provide a unifying publishing platform and a discussion forum that caters to scientists across the entire spectrum of disciplines focused on cardiovascular and blood health.

Nature Reviews Psychology

Nature Reviews Psychology will publish high-quality commissioned reviews on all aspects of psychological science, covering all subfields of cognitive, social and clinical psychology, including developmental aspects and methodological issues, as well as more applied areas. The journal presents an opportunity to meet the needs of the social science community; there is currently no social science title in the Nature Reviews portfolio. Nature Reviews Psychology will provide a holistic view of the field and the wider societal implications of psychology research.

Topics include:

Clinical and Counselling Psychology, Cognition, Cognitive Science, Comparative Psychology, Developmental Psychology, Educational Psychology, Emotion Science, Environmental Psychology, Health Psychology, Judgment & Decision-making, Organizational Psychology, Sensation & Perception, Personality & Social Psychology, Psycholinguistics, and Psychopathology.
